

EXCELLENT FEATURES SPECAIL INK

NAC PRINTING INKS FOR FABRICS

NAC Printing Ink for Fabrics was developed to meet requirement of printing on fabrics of Artificial Fibers and Synthetic Fibers.

Printers have trouble in printing on fabrics with conventional ordinary ink because fixing on fabrics and washability are poor.

NAC Printing Ink for Fabrics was developed to eliminate such troubles applying up-to-date Synthetic Resin Chemistry.

This ink has excellent, firm fixing and good washability in printing on fabrics.

FEATURES

1. NAC Printing Ink for Fabrics fixes firmly to Nylon, Acetate and Cotton, and good prints available on these textiles.
2. This ink is easily printed by Offset system on fabrics such as Nylon Taffeta, Acetate Satin and Cotton fabrics.
3. Process Printing on fabrics is available.
Can get beautiful photo-prints with this ink.
4. Conventional Offset ink has poor washability, easily discolors or peels off, but this ink is not so.
Can get hard washable prints with this ink.
5. This ink is formulated with specially selected high resistive materials (light fastness, acid resistance, alkali resistance, solvent resistance), so has much better resistivity than ordinary ink.

HOW TO USE

1. Use like as ordinary resin type inks.
2. Use as it is.
3. The mixing with other ordinary inks harms features of this ink, so the mixing with other ink should be avoided.
4. To soften this ink, use our specially made NY REDDUCER.
Ordinary printing additives and compound are not recommendable.

VARIETY OF THIS INK

Yellow; Magenta; Blue; Black; Bronze Blue; Bronze Red; Medium and NY REDUCER.

ADJUSTER

To adjust the condition of this ink, use our specially made NY REDUCER.
Troubles of decreased fixing of ink film and less drying are eliminated.
